##ÿÿ#####ÿY#ÿÿ#d######Z#(#######DobjectivesThe ACTD will utilize sensors, reliable near real time communications paths, and capable workstations to increase the value of Unattended Ground Sensors (UGS) on the battlefield. The missions that will be addressed are the measurement of local weather conditions and the detection of deep time-critical targets. Technology UGS are available from a number of DoD agencies. These UGS will be integrated into a coherent ensemble for use on the battlefield. New sensor concepts will also be developed, such as the miniaturization and repackaging of existing UGS. Lead Service and User SponsorsThe User Sponsors for this ACTD will be CENTCOM and SOCOM. The acquisition agents are DARPA, the Central MASINT Office (CMO), and SOCOM. The lead Service will be the Air Force. Schedule Environmental characterization is planned for FY97 to FY98. Deep target prosecution evaluation is scheduled for FY97 to FY99.Å#
